Table of contents

Abstract

Chapter One – INTRODUCTION
1.0 Research Overview 1
1.1 Problem Statement 2
1.2 Research Objective 3
1.3 Scope 3
1.4 Methodology 4
1.5 Research Organization 5

Chapter Two - LITERATURE REVIEW 9
2.0 Introduction 9
2.1 Absorbing Human Computer Interaction Concepts in Building Effective Web Sites 11
   2.1.1 Principle One: Recognize the Diversity 11
      2.1.1.1 Group Academic Audiences 12
         2.1.1.1.1 Novice or first-time users 12
         2.1.1.1.2 Knowledgeable intermittent user 13
         2.1.1.1.3 Expert frequent users 13
      2.1.1.2 Identifying tasks and services 13
   2.1.2 Principle 2: Use the Eight Golden Rules of Interface Design 16
      2.1.2.1 Strive for consistency 16
      2.1.2.2 Enable frequent users to use shortcuts 17
      2.1.2.3 Offer information feedback 17
      2.1.2.4 Design dialogs to yield closure 17
      2.1.2.5 Offer error prevention and simple error handling 17
      2.1.2.6 Permit easy reversal of action 18
      2.1.2.7 Support internal locus of control 18
      2.1.2.8 Reduce short-term memory load 18
   2.1.3 Principle 3: Prevent Errors 18
2.2 Quality Characteristics and Attributes for Academic Web Sites 20
2.3 2QCV2Q: A model for web site design and evaluation 25
2.3.1 Statistical Evaluation Methodology 28
2.3.2 Spider Chart 31

2.4 Test of information quality 31
2.4.1 Pre-evaluation 33
2.4.2 Select sources likely to be reliable 33
2.4.3 Evaluating information 34
  2.4.3.1 Reliable Information is Power 34
  2.4.3.2 Source Evaluation is an Art 34
2.4.3.3 The CARS Checklist 34

2.5 Usability assessment model 35
2.5.1 Usability assessment model 36
  2.5.1.1 Page Layout 36
  2.5.1.2 Navigation 36
  2.5.1.3 Design consistency 36
  2.5.1.4 Information content 37
  2.5.1.5 Performance 37
  2.5.1.6 Customer service 37
  2.5.1.7 Reliability 37
  2.5.1.8 Security 38
  2.5.1.9 Other usability components. 38

2.6 Determining performance of web site application – technical view. 38
  2.6.1 Busy Background. 38
  2.6.2 Busy Graphic in General. 39
  2.6.3 The Linear Look. 39
  2.6.4 The “Under Construction” Sign 39
  2.6.5 Endorsement of Particular Endorsement 40
  2.6.6 Not Understanding Your Target Market. 40
  2.6.7 Infrequently Asked Questions in FAQ 40
  2.6.8 Inflexible Search Engines 41

2.7 Importance of Separating Content and Layout in an Academic Web Site 41
  2.7.1 Extensible Markup Language (XML) 42

2.8 Summary 44
Chapter Three - METHODOLOGY

3.0 Introduction 45

3.1 Current Academic Web Sites Performance and User Satisfaction Survey (Survey 1) 46

3.2 Generating requirements survey (Survey 2) 48

3.3 Prototype Academic Web Site Performance and User Satisfaction Survey (Survey 3) 48

3.4 Determining Academic Institution Web Site Ciceronian Loci in relevant of survey 1 and survey 2 48

3.5 Advantages of Conducting Survey (Questionnaires) 51

3.6 The Prototyping Methodology in Designing the Web Site using XML, DHTML and HTML 52

3.7 Summary 53

Chapter Four - ANALYSIS OF RESULTS AND DISCUSSION

4.0 Introduction 54

4.1 Survey 1: Evaluating the current performance of Malaysian Academic Institutions web site – using 2QCV2Q Model and Spider Chart 54

4.1.1 Performance of Malaysian Academic Institution Web Site Design and Analysis using 2QCV2Q Model 55

4.1.1.1 Determining Academic Institution Web Site Ciceronian Loci 55

4.1.1.2 Performance of Malaysian Academic Institution Survey Result 55

4.1.1.3 Analysis of the Survey 63

4.2 Survey 2: Determining User Needs Survey 65

4.2.1 Grouping the Stakeholders 65

4.2.2 Frequency of Browsing Respective Academic Web Site 66

4.2.3 Frequency of Browsing Other Academic Web site 66

4.2.4 Reasons on Browsing Respective Web Site 67

4.2.5 Reasons on Browsing Other Academic Web Sites 67
4.2.6 Satisfactory Level of Respective Academic Web Site 68
4.2.7 Stakeholder Needs in Browsing Academic Web Site 68

4.3 Survey 3: Evaluating the performance of the FCSIT prototype website
– using 2QCV2Q Model and Spider Chart
4.3.1 Performance of Prototype FCSIT Web Site – Design and Analysis Using The 2QCV2Q Model
4.3.1.1 Determining the prototype web site Ciceronian Loci 69

4.4 Summary 72

Chapter Five - PROPOSED FRAMEWORK 73
5.0 Introduction 73
5.1 Proposed Framework 73
5.1.1 HCI principles 73
5.1.1.1 HCI Principles for Academic Web Site 74
5.1.1.2 User-Centered Design 74
5.1.1.3 User task analysis 75
5.1.1.4 Human factor in user interface design and guideline 79
5.1.1.5 Web Usability 81
5.1.2 Quality Characteristics and Attributes for Academic Web Sites 82
5.1.3 2QCV2Q: A model for web site design and evaluation 83
5.1.3.1 Importance of quantitative evaluation in determining quality of academic web site 84
5.1.4 Information evaluation and management on academic web site 84
5.1.4.1 Information evaluation 85
5.1.5 Information building and management 86
5.1.6 Technical significance cost, budgets and other requirements 87
5.2 Summary 88
Chapter Six : SYSTEM ANALYSIS

6.0 Analysis of the System
6.1 Analysis on System Architecture
   6.1.1 Web based client / server model
6.2 Considerations on the Programming Technologies and Language
   6.2.1 Scripting Language
      6.2.1.1 Visual Basic Scripting Edition (VBScript)
      6.2.1.2 JavaScript
      6.3.1.3 HTML
   6.2.2 ActiveX Controls
   6.2.3 JAVA and JDBC
   6.2.4 Common Gateway Interface
   6.2.5 Macromedia Dream Weaver
   6.2.6 Microsoft Visual Studio .Net
6.3 Consideration on the Database Implementation
6.4 Conclusion on Technology Analysis
6.5 Requirement Analysis
   6.5.1 Functional Requirement – Information Display Module
   6.5.2 Functional Requirement – Search Module
   6.5.3 Non-Functional Requirement
6.6 Run-time Requirements
   6.6.1 Server Hardware Requirements
   6.6.2 Client Hardware Requirements
   6.6.3 Client Software Requirements

Chapter Seven : SYSTEM DESIGN

7.1 Overview of FCSIT Architecture
   7.1.1 User Services
   7.1.2 Server Services
7.2 User Interface Design
   7.2.1 Interface Design for Display Information Module
      7.2.1.1 Background color
      7.2.1.2 Menu Design
