# TABLE OF CONTENTS

Abstract ................................................................................................................................. i  
Acknowledgments ................................................................................................................ ii 
Table Of Contents ................................................................................................................ iii 
List Of Figures ....................................................................................................................... vii 
List Of Tables ......................................................................................................................... ix 
List Abbreviations ................................................................................................................. x 

CHAPTER 1: INTRODUCTION................................................................................................. 1 
1.1 Introduction ..................................................................................................................... 1  
1.2 Problem Statement ........................................................................................................ 3  
1.2.1 Predictive Text Entry Current Problems ............................................................... 4  
1.3 Statement Of Objectives ............................................................................................... 6  
1.4 Research Significance .................................................................................................. 7  
1.5 Research Scope ............................................................................................................ 9  
1.6 Project Limitations ...................................................................................................... 9  
1.7 Target User .................................................................................................................. 10  
1.8 Mobile Technologists and Linguist ........................................................................... 10  
1.9 Thesis Organizations ................................................................................................. 12 

CHAPTER 2: LITERATURE REVIEW..................................................................................... 15 
2.1 Introduction ................................................................................................................... 15  
2.2 Short Message Service (SMS) ..................................................................................... 17  
2.2.1 Concatenated Short Message Service ................................................................... 18  
2.2.2 Structure of a Message Segment ........................................................................... 19  
2.2.3 Text Compression and message submission ....................................................... 19  
2.3 Current Text Entry Methods ...................................................................................... 20  
2.3.1 Multi-Press Input Methods ................................................................................. 21  
2.4 Predictive Text Entry Methods .................................................................................. 23  
2.4.1 LetterWise .......................................................................................................... 25  
2.4.2 Predictive Word Completion ............................................................................. 26  
2.4.3 T9 ....................................................................................................................... 27  
2.5 Predictive Text Problems ........................................................................................... 28  
2.5.1 Language feature used in Predictive Text .......................................................... 29  
2.6 Competitors Comparison ........................................................................................... 30  
2.7 Predictive Text Entry Techniques .............................................................................. 31  
2.7.1 Fitts’s Law Model ............................................................................................... 32  
2.7.2 Hick Hyman’s Law ............................................................................................. 32  
2.8 Methods ...................................................................................................................... 33  
2.9 Results ......................................................................................................................... 37  
2.10 Algorithm for Prediction ......................................................................................... 37  
2.11 Malay Language and inherent issues ....................................................................... 41  
2.12 Summary of the Chapter ......................................................................................... 43  
2.13 Conclusion ................................................................................................................ 44
CHAPTER 3: RESEARCH METHODOLOGY

3.1 Introduction

3.2 Research Methodology Description

3.2.1 Literature Review

3.2.1.1 Survey

3.2.1.2 Observation

3.2.1.3 Methods

3.2.2 The Proposed Predictive Text Entry Algorithm

3.2.3 Requirements Analysis

3.2.4 System Design

3.2.5 System Implementation and Testing

3.2.6 System Evaluation

3.2.7 End Product

3.2.8 Outcome

CHAPTER 4: THE PROPOSED PREDICTIVE TEXT ENTRY ALGORITHM

4.1 Introduction

4.2 Proposed problems and Solutions

4.3 Process of the MLPTET Algorithm

4.4 The Conceptual Diagram of Predictive Mechanism

4.5 Summary of this Chapter

CHAPTER 5: REQUIREMENT ANALYSIS

5.1 Introduction

5.2 General Assumptions

5.3 User Characteristics

5.4 Scope of the Research

5.5 Object Oriented Analysis

5.5.1 Users Requirements

5.5.2 Browse Dictionary Component

5.5.3 Add New Word Component

5.6 System Requirements

5.6.1 Use Case diagram of the system

5.6.2 Malay Predictive Text Entry Tool Components

5.6.3 Auto Search Option Component

5.6.4 Text Input Component

5.6.5 SMS Send Component

5.7 Functional Requirements

5.8 Non-Functional Requirements

5.9 System Requirements

5.10 Summary of the Chapter

CHAPTER 6: SYSTEM DESIGN

6.1 Introduction

6.2 System Architecture

6.3 Sequence Diagram

6.3.1 Sequence Diagram of MLPTET

6.3.2 Activity Diagram of MLPTET

6.4 General Design Overview

6.5 Record Management
