ACKNOWLEDGEMENTS

I praise Allah for His consent in completing this dissertation. My gratefulness to the Almighty for good health and compelling strength throughout the research.

First and foremost, I am most gratitude to my supervisors, Mrs. Siti Hafizah Ab Hamid and Mrs. Nazean Jomhari for their guidance throughout the labyrinth of the system, course of my study and most of all for her unstinting words of encouragement which helped tremendously towards the completion of this dissertation. Without their immense help, this study would never have been materialized.

I am most grateful to my beloved husband Syed Abd Halim for his unlimited love, patience, inspiration, invaluable ready support and for always being there for me. His indefinite support was really helping me to go trough this priceless experience.

Special thanks for my loving parents, Mr. Wan Husin and Mrs. Zaidah, for their prayers and supports. Their supports were really giving me strength to complete this dissertation. Special thanks also to my siblings, Wan Fazri, Wan Hasnani and Wan Faznan, for their love, care, and full encouragement into all my endeavors.

Last but not least, deepest gratitude to my colleagues and fellow course mates in FSKTM, who gave me their useful opinions, invaluable guidance, fruitful discussions and ideas about this project. Their assistance will never been forgotten.
