Waste Atlas
The World's 50 Biggest Dumpsites
2014 Report

Collective Work

For the very first time the World's 50 biggest active dumpsites are profiled in this 2nd Annual Report of Waste Atlas. Data on important dumpsites are collected and visualised in a unified way, supported by a brief statistical analysis. These dumpsites could be associated with important negative socio-economic and environmental impacts, highlighting the importance of global cooperation for elimination of uncontrolled disposal sites.
WASTE ATLAS
2014 REPORT

STEWING COMMITTEE

Antonis Mavropoulos - CEO of D-waste and Project Director
Hermann Koller - Managing Director of ISWA
Markus Luecke - GIZ, SWEEP-Net Teamleader
Surendra Shrestha - Director of International Environmental Technology Center, UNEP
Masuro Tanaka - SWAPI Coordinator, Tokyo University
Nickolas J. Themelis - Professor of Chemical Metallurgy, Department of Earth and Environmental Engineering, Columbia University, US

SCIENTIFIC COMMITTEE

Jose Fernando Juca - Professor at UFPE, Recife Area, Brazil
Stratos Kalogirou - President of WtERT Greece
Agamuthu Pariatamby - Editor-in-Chief of WM&R, University of Malaya, Kuala Lumpur, Malaysia
Mario Russo - Coordinator Professor at Polytechnic Institute of Viana do Castelo, Portugal
Costas Velis - Head of Waste Atlas Scientific Committee
Goran Vujic - Lecturer in Resource Efficiency Systems, School of Civil Engineering, University of Leeds

WASTE ATLAS TEAM

Waste Atlas has been developed through coordinated efforts and contributions by almost a thousand people. However, most of the work regarding the web interface and the data acquisition has been done by the permanent Waste Atlas Team, namely:

Alexandros Mavropoulos - D-Waste Expert
Antonis Mavropoulos - D-Waste Founder & CEO
Ilianna Koukosia - GIS Expert
Maria Tsakona - D-Waste Product Manager
Niki Mavropoulo - Waste Atlas Project Manager
Nikos Rigas - Graphic Designer
Theodore Andreadakis - Layout Editor
