CIES Bibliography 2013

The 2013 *Comparative Education Review* bibliography of refereed journal articles on topics relevant to comparative and international education covers all 12 months of the last calendar year and includes 2,594 entries—a 5 percent increase on the set assembled in the 2012 bibliography. They are drawn from over 421 journals, principally in English, among over 1,100 searched. Several new topic areas have been added to the list of categories, including Special Education and Health Education, in order to accommodate the increasing number of related publications. An article reviewing the content of the 2013 bibliography and the ways in which it has evolved over recent years will appear in connection with the November 2014 issue of *CER*. Articles on research, methodology, and theory in such fields of course defy simple classification into single topic areas, since most cross several such categories. Though an effort has been made to identify the most important focus of each reference, a singular classification system can be misleading, and we are therefore currently working on a database system for next year’s *CER* bibliography that will make it possible to associate a variety of keywords with each entry and to carry out more complex searches. References without page numbers are from entirely online publications (many of them open access as well), which may be consulted by searching on the publication title and then visiting their website. This work could not have been accomplished without the determined efforts of a team of graduate assistants at Florida State University, coordinated by Erica Amorim and Seyedahmad Rahimi, to whom I wish to extend both thanks and warm congratulations.
